

## Tennessee Tech - Geology Professional Licensure Disclosure

To be qualified for registration as a Professional Geologist in Tennessee, students must graduate from a college or university and complete a minimum of 30 semester hours of course work in geology, geophysics, geochemistry, engineering geology, or their subdivisions. Students who graduate from Tennessee Tech with a Bachelor of Science (B.S.) in Geosciences with a Geology concentration meet this requirement. Students who graduate from Tennessee Tech with a B.S. in Geosciences with a Geography Information Systems Concentration or a B.S. in Geosciences with an Environmental Geology Concentration may not meet the requirement and should discuss with their faculty mentor the completion of elective courses that fall within the above disciplines. Additional information about licensure in Tennessee as a Professional Geologist is available through the [Tennessee Commerce and Insurance Customer Service Center](#).

Tennessee Tech has not determined whether these programs listed meet the requirements for licensure as a Professional Geologist in other U.S. states or territories. Tennessee Tech recommends that students who plan to seek licensure as a Professional Geologist outside of Tennessee contact the appropriate state or territorial licensing agency to obtain current information about licensure requirements. For American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, Republic of the Marshall Islands, Federated States of Micronesia, and Republic of Palau, these are undetermined at this time as information regarding requirements is unavailable.

| State                | Licensure Determination | State Licensure Agency  |
|----------------------|-------------------------|---|
| Alabama              | Undetermined            | <a href="https://www.algeobd.alabama.gov/">https://www.algeobd.alabama.gov/</a>   |
